

ANDAVI

MODULAR WALL SYSTEM

TUOHY

Andavi Modular Wall System
Design: Annie Lee and David Rush

Andavi is a matrix wall of modular storage components that defines spaces for open plan and private areas. It discretely uses an adjustable post and cabinet format to control the relative degree of privacy or openness desired while offering ergonomic, acoustical, power/data, and materiality benefits. It serves office design, storage, space divider, collaborative exchange and backdrop, all within a population of interchangeable components.

Andavi Modular for conference, private office, open plan—the total workplace.
Available in two heights

Exquisite materials and ultimate flexibility.

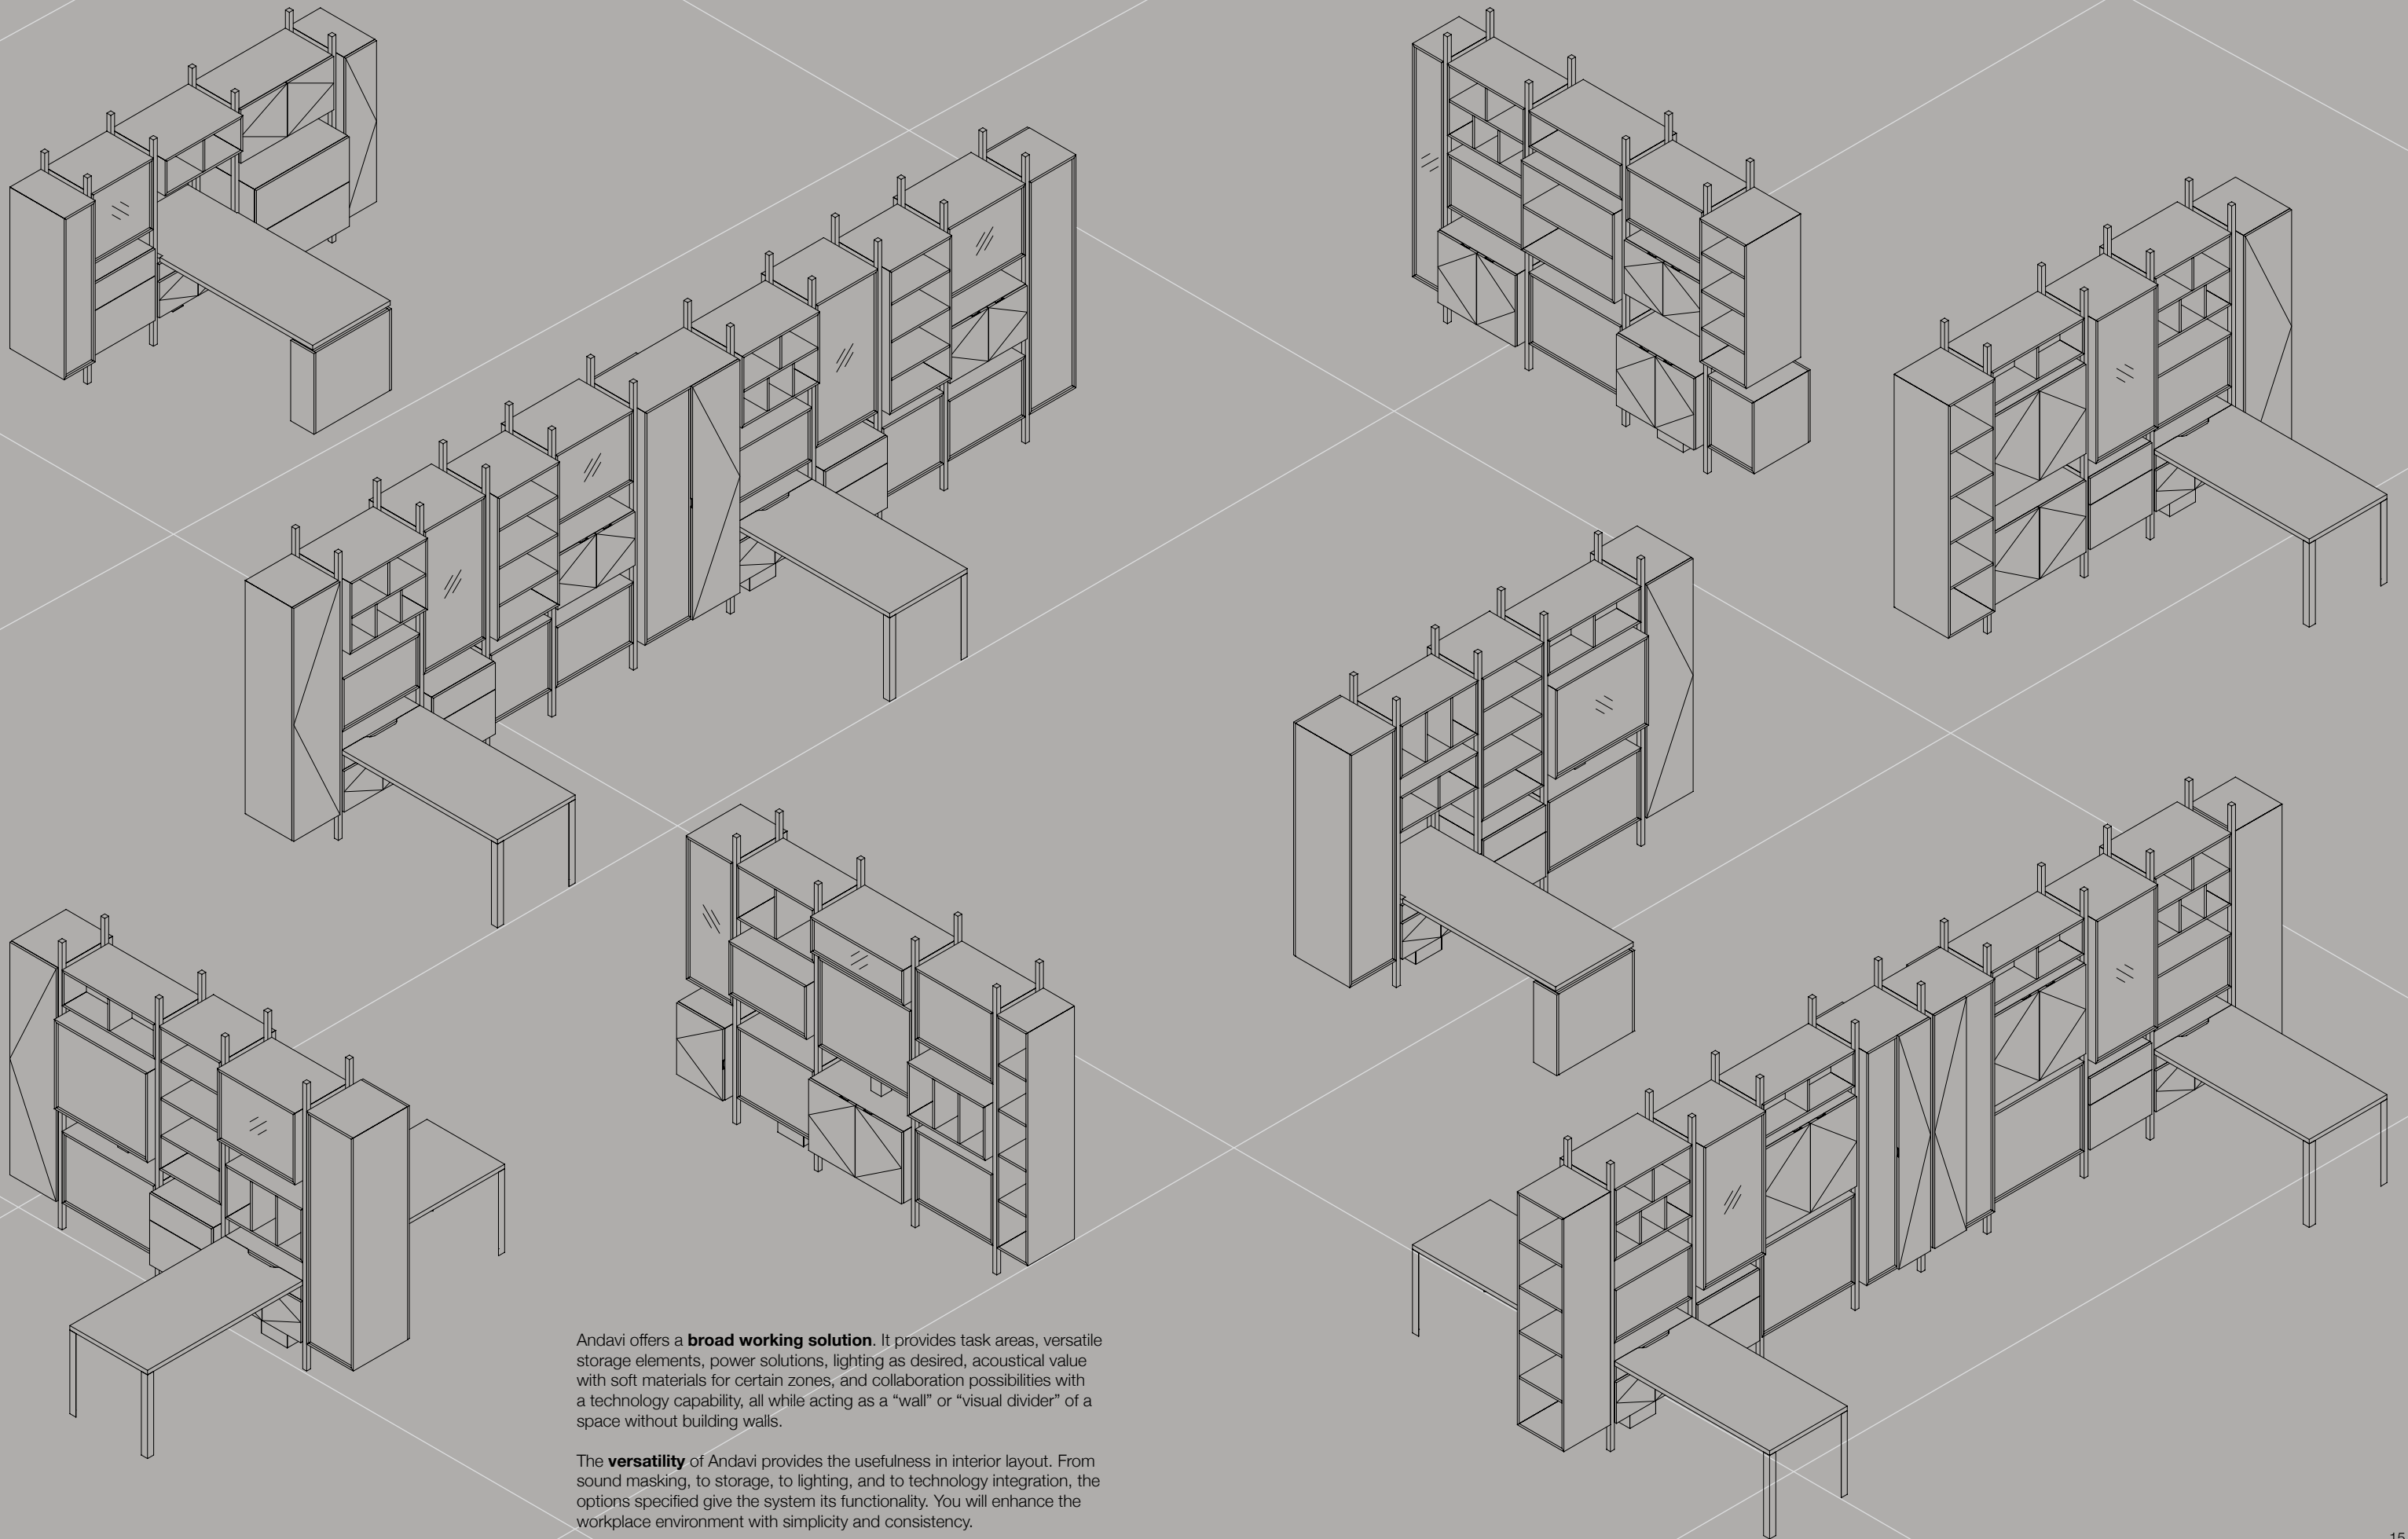

Fixed height or adjustable runoff desks.

Single or bi-directional storage modules are vertically located per your specification, based on the amount of privacy or openness desired. The post system allows for adjustment and leveling.

Andavi offers a **broad working solution**. It provides task areas, versatile storage elements, power solutions, lighting as desired, acoustical value with soft materials for certain zones, and collaboration possibilities with a technology capability, all while acting as a “wall” or “visual divider” of a space without building walls.

The **versatility** of Andavi provides the usefulness in interior layout. From sound masking, to storage, to lighting, and to technology integration, the options specified give the system its functionality. You will enhance the workplace environment with simplicity and consistency.

ELEGANCE WORKS

Andavi Modular Wall System

Design: Annie Lee and David Rush

Today's workplace design struggles with the balance between open plan and private spaces. While open layout is desired for reasons such as sharing lights, promoting collaboration, and flexible growth within the given space, it also adds to rising concerns about noise control, power storage and ability to focus at work. Andavi addresses these concerns by providing versatile and modular storage solutions that double as space dividers. It integrates power solutions, lighting solutions, acoustical values with soft materials for certain zones, and collaboration possibilities with technology capability.
