

BAU

TABLE-BENCHES

TUOHY

Bau Table-Bench
Design: John Nelson

Wood, metal and upholstery unite in a manner that is innovative and refreshing yet flexible enough to work in a broad spectrum of interior applications. The detailing of the metal leg knifing through the wood bench top has been meticulously considered so the bench presents well from anywhere in the room and the quality of its craftsmanship is abundantly clear whether it's being utilized or simply admired. Widths range from 36w to 78w; heights are 17h and 21h, the latter for end table applications.

ELEGANCE WORKS

Bau is available as a bench, with or without seat pad,; a stabilizing/fixing kit is included. Seat pads are available in standard and COM/COL offerings.
