DRAWER CONSTRUCTION

A fine point for a quality casegood product is the inner drawer construction. Each TUOHY casegood offers you uncompromised excellence in this area as well. Drawer boxes are constructed with dovetail joinery for maximum durability. The drawer face is mounted separately to this box (i.e., five-sided construction) to maintain integrity.

Drawer bottoms are dadoed on all four sides. Slides for box drawers are rated at 100 pounds static load capacity; slides for file drawers are rated at a heavy duty 150 static load capacity. All slides are concealed, full extension and soft-close.

Box drawers have a removable divider, adjustable when depicted (⇕). File drawers have file frames for filing laterally or front-to-back, as depicted above. For Drawers for Lap Area, Drawer Pencil Tray, and Locks: See the Introduction/Terms-Options section of the Master Price List, page 12.
