DRAWER CONSTRUCTION

A fine point for a quality casegood product is the inner drawer construction. Each TUOHY casegood offers you uncompromised excellence in this area as well. Drawer boxes are constructed with dovetail joinery for maximum durability. The drawer face is mounted separately to this box (i.e., five-sided construction) to maintain integrity.

Drawer bottoms are dadoed on all four sides. Slides for box drawers are rated at 100 pounds per drawer; slides for file drawers are rated at a heavy duty 150 pound load per drawer. All slides have progressive action.

Box drawers have a removable divider, adjustable when depicted (±). File drawers have suspension rods for filing laterally or front-to-back, as depicted. For Drawers for Lap Area, Drawer Pencil Tray, and Locks: See the Introduction/Terms-Options section of the Master Price List, page 12.

How to Order Credenzas and Buffet Credenzas:

Choose the Credenza or Buffet format desired from each of the four listings above and on the opposite page. Note the ProdNo and List \$ that correspond to the depth and back (finished/unfinished) desired. Follow the ProdNo column down until you have located the first (left-most) pedestal desired, then append the letter/number code to the original item number and add the price to the original price. Continue adding pedestals in this manner until your unit is complete. The overall credenza or buffet width will be the accumulated widths of all pedestals chosen; the overall price will be the accumulated prices and the final item number will be the original number plus all of the letter codes for the pedestals added. The maximum running width is 120 inches; units over 72 inches ship in two sections and require assembly. Tops are finished. See also the information on the following page.
