How to Specify

The Univers Conference line is an extensive system for pairing top shapes, materials and edges with an array of styled bases and power options. This planning guide will guide you through determining the specifications for the table your client needs.

1. Select the Top Shape and Size.

To begin, determine the number of seats needed at the table to identify the table top size and shape.

Univers Conference tables are available in seven top shapes and numerous sizes.

2. Select the Top/Edge Surface combination for your table

- a. Choose the surface option for the top
- b. Choose from a Wood, Metal or Self Edge edge detail.

Univers has five edge details and nine surface material options. These can be configured in numerous ways.

Note: Curved Top shapes (circle, track, ellipse) do not allow for certain edge details.

3. Select the Finish Options for the Top and Edge details

4. Select the Base style and Base Finish option that support your Top shape and Edge detail

- a. Consider knee space dimensions (pages 25-108)

5. Select the Power Unit.

- a. Consider power unit placement (pages 129-146)

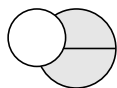

Recommended Seating Capacity

Recommended Seating Capacity

Seating capacity is based on 27" per person.

Round

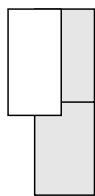

Diameter	Seats	Pieces
30"	2-3	1
36"	3-4	1
42"	3-5	1
48"	4-5	1
54"	4-7	2
60"	5-7	2
66"	6-8	2
72"	6-9	2

Square

Diameter	Seats	Pieces
30"	2-3	1
36"	3-4	1
42"	3-5	1
48"	4-5	1
54"	4-7	2
60"	5-7	2

Rectangle

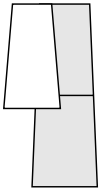

Width	Depth						Pieces
	30"	36"	39"	42"	48"	52"	
42"	4	-	-	-	-	-	1
60"	4-6	-	-	-	-	-	1
72"	-	4-6	-	-	-	-	1
78"	-	-	6-8	-	-	-	1
84"	-	-	-	6-8	-	-	1
90"	-	-	-	-	6-8	-	1
96"	-	-	-	-	6-12	-	1
108"	-	-	-	-	8-12	-	1
120"	-	-	-	-	-	8-14	1
132"	-	-	-	-	-	8-14	2
144"	-	-	-	-	-	10-16	2

Note:

- › Seating allowance per table is dependent on the chair selected for use with the Univers Table.
- › All sizes are given in nominal dimensions.
- › Available shapes are dependent on desired edge style.

Seating capacity is based on 27" per person.

Power Options

Identifying the best power for the table will be determined by need and the base option chosen.

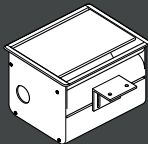

Power Options

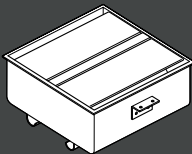

There are two main types: Surface Power Units (5 options) and Perimeter Power (2 Options). The Zi base can also support: Data Units and Pop-Up Center.

Power locations for table shape & bases are identified in the following pages.

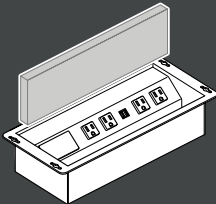

Surface Power Units

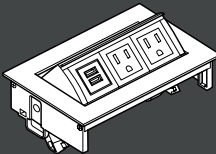

Power-Comm Troughs
(Single)

Power-Comm Troughs
(Dual)

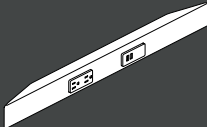

Power-Comm
Recessed Consoles
(GC & GCS)

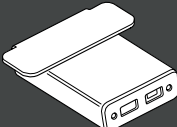

MhoB

Perimeter Power & Data Units

Power-Data Aprons

Garcia 2-Trac

All Base Styles

Recommended power units for Univers Base styles:

Surface Power Units

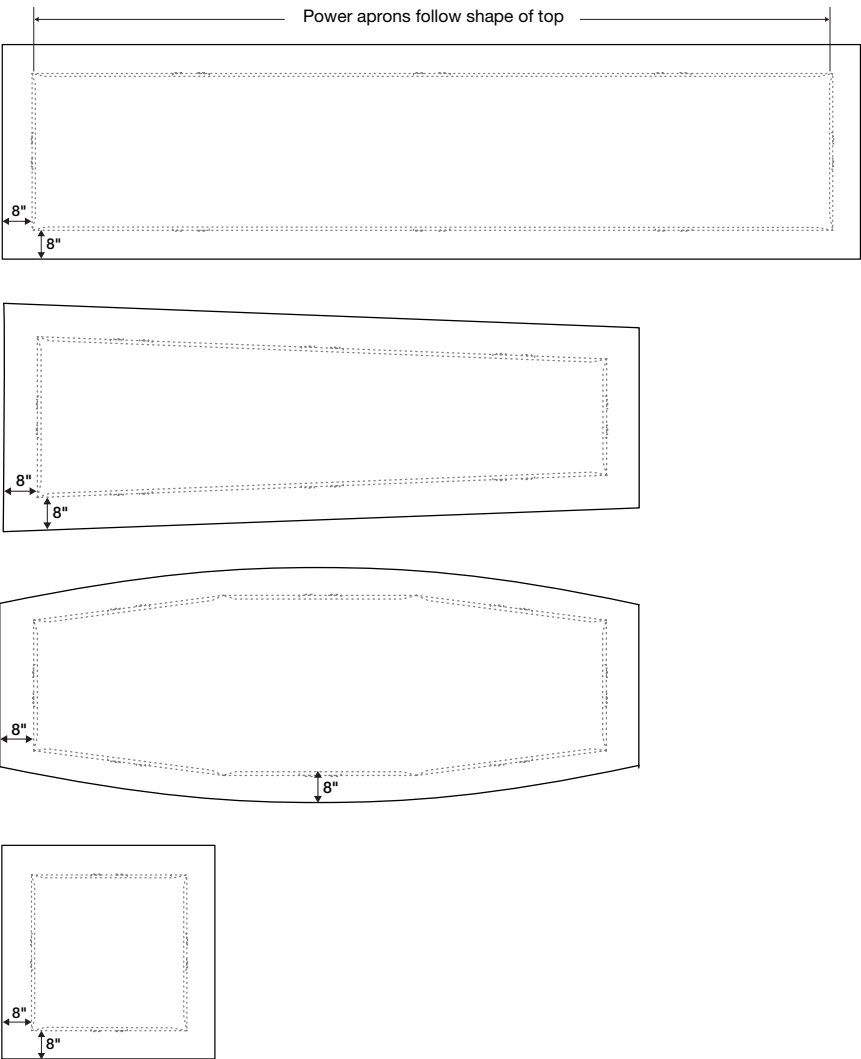

- Power-Comm Troughs - Single
- Power-Comm Troughs - Double
- Power Comm Recessed Consoles
- MhoB

Perimeter Power

- Power Data Apron
- Garcia 2-trac

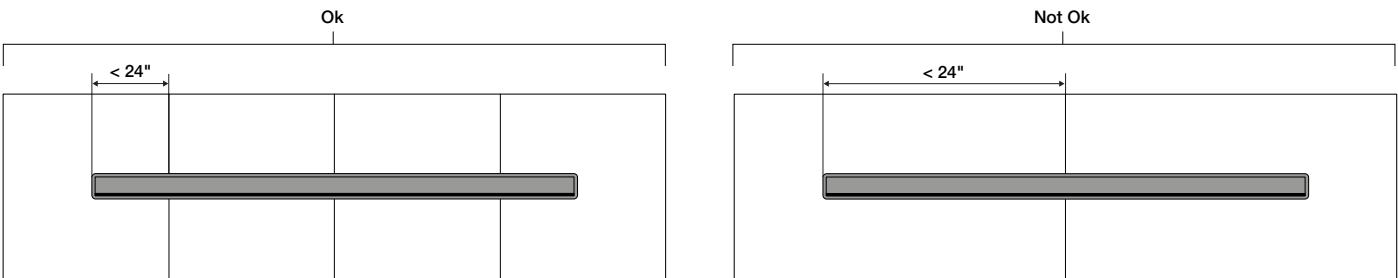

Power Aprons

- Power aprons are placed around the perimeter of the table and typically recessed 8" in from edge (may require less of a recess on smaller tops to avoid base interference).
- Recommended for Rectangle, Video, Boat and Square tops
- Not recommended for video tops 108" or less with Coda Vee base due to base interference
- Not recommended for Circle, Ellipse, or Track tops due to the curves of the shape

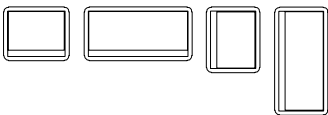

Power Comm Troughs

Power comm troughs cannot break into top sections more than 24". To allow a longer power comm trough, top must be sectioned further.

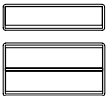

Coda-Vee

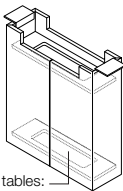

GC Interact, MhoB, 7" and 12" single or double Power-Comm Troughs can be oriented either way.

All single or double Power-Comm Troughs 18" or greater, all double Power-Comm Troughs and GC Interface units must be oriented this direction

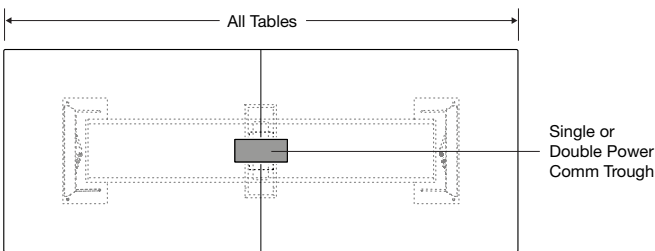

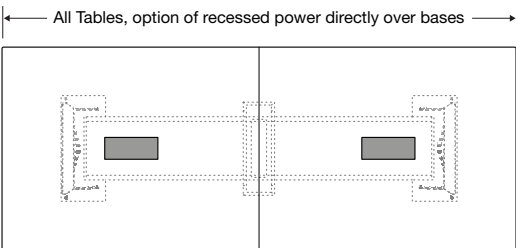

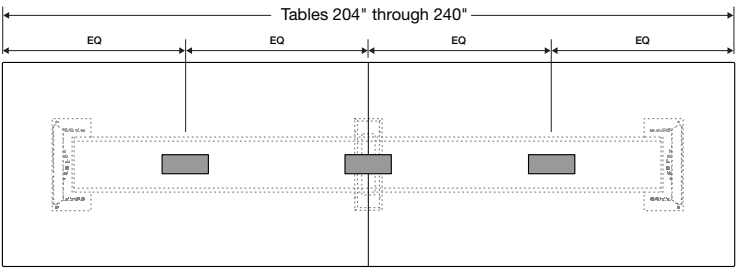

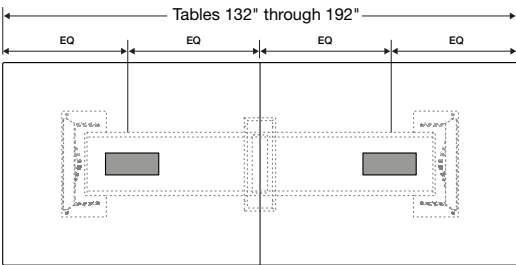

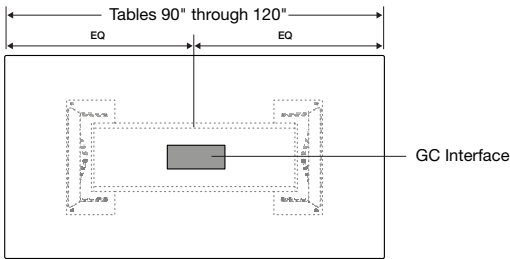

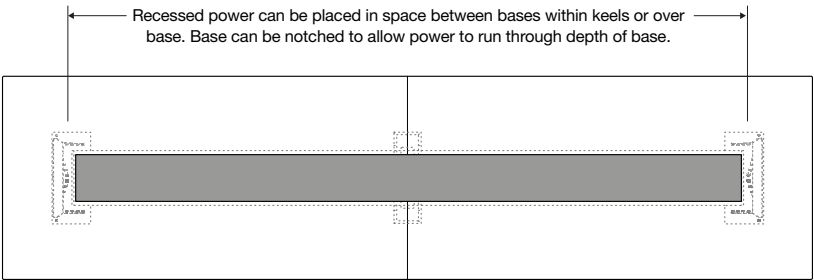

Tables 72" – 120" have no center plinth and require additional wire management options such as Cable Drop.

Tables 132" – 240" have a center plinth base that allows for wire management.

Cutout for tables:
132" x 180" = 15" x 4"
192" x 240" = 18" x 4"

Tuohy recommendations
for recessed consoles
for all shapes

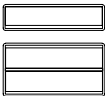

Coda-Wire

GC Interact, MhoB, 7" and 12" single Power-Comm Troughs can be oriented either way EXCEPT on 72"w Tables in which case ALL units EXCEPT the GC Interact must be orientated this way.

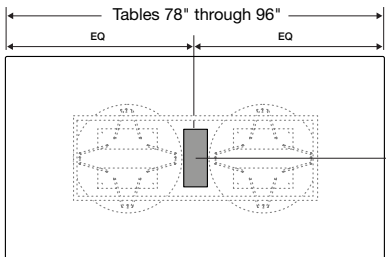

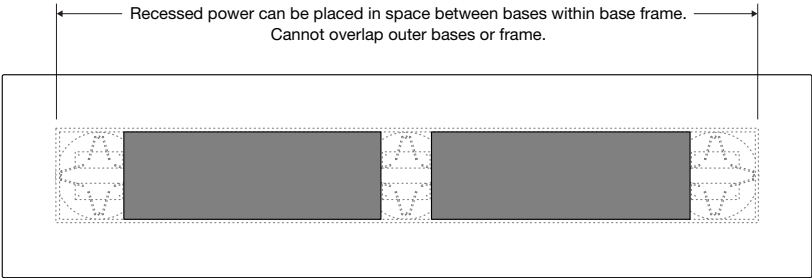

All single troughs 18" or greater, all double Power-Comm Troughs and GC Interface units must be oriented this direction.

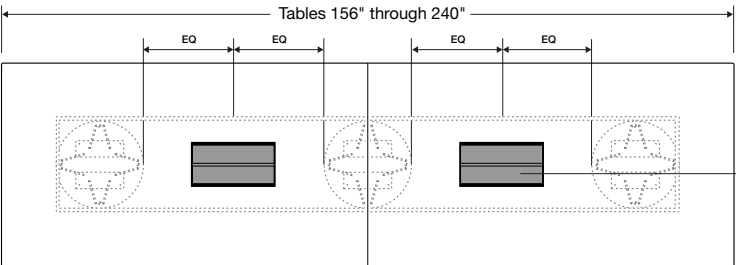

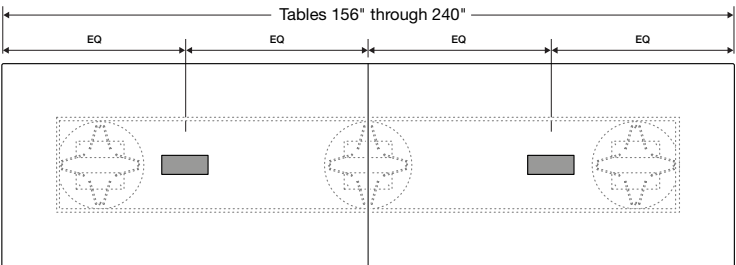

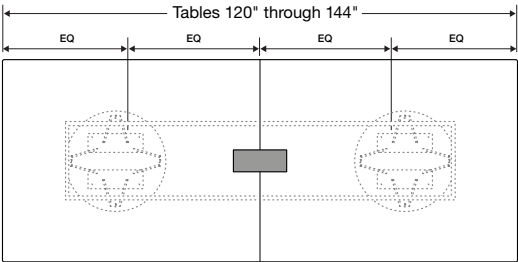

Double troughs will not fit on tables 72" – 96". Troughs cannot extend the width of the Coda-Wire base tables due to interference.

No wire management through bases, they require additional wire management options such as a Cable Drop.

Tuohy recommendations
for recessed consoles
for all shapes

78"-96" single or double trough fit between mounting plates

Single or Double Power Comm Trough

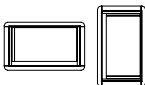

Coda-X

MhoB is the only recessed power unit that fits on tables 72" – 84"

GC Units, MhoB and single 7" and 12" Power Comm troughs must be oriented this way between bases on tables 90" and 96" wide.

GC Units, MhoB and single 7" and 12" Power Comm troughs can be oriented either way between bases on tables 108" or greater.

GC Units, MhoB power must be oriented this way over center plinth.

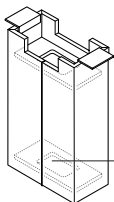

Recessed console: All single Power Comm troughs greater than 12" and double power comm troughs must be oriented in this direction on tables 108" greater and width must fit between bases.

Troughs cannot extend the width of the Coda-X base tables due to base interference.

Tables 72" – 120" have no center plinth and require additional wire management options such as Cable Drop.

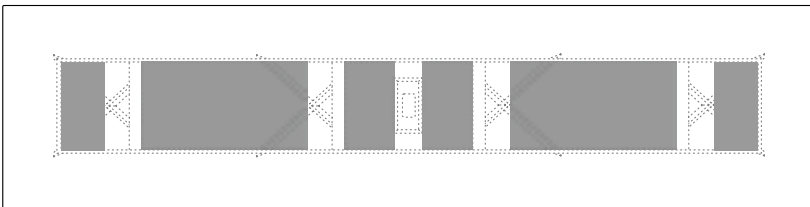

Bottom cutout is 7" x 4"

Tables 132" – 240" have a center plinth base that allows for wire management.

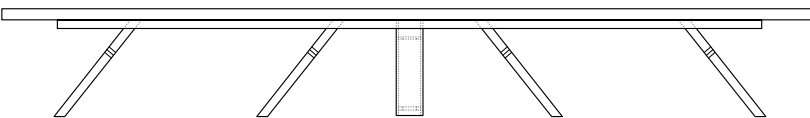

Tuohy recommendations for recessed consoles for all shapes

Recessed power can be placed over center base but cannot overlap base panels or mounting plates. Base is notched to allow power to run over depth of base (see base detail).

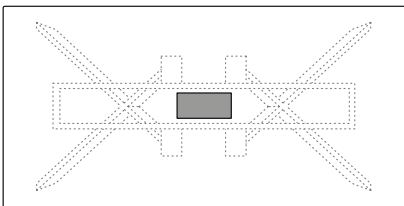

Recessed power can be placed in space between bases within base frame. Cannot overlap base frame.

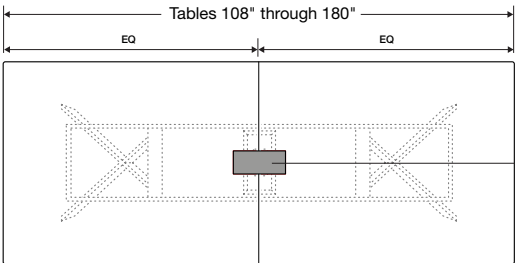

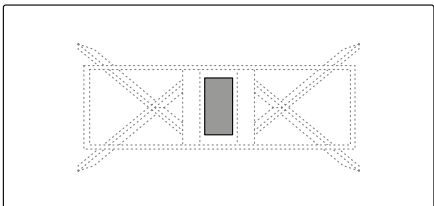

Power in this section must not interfere into leg. Avoid power too close to center X-bases due to leg interference.

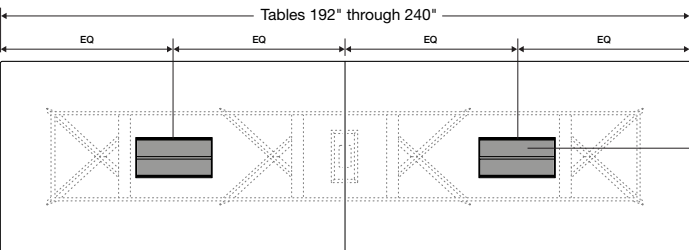

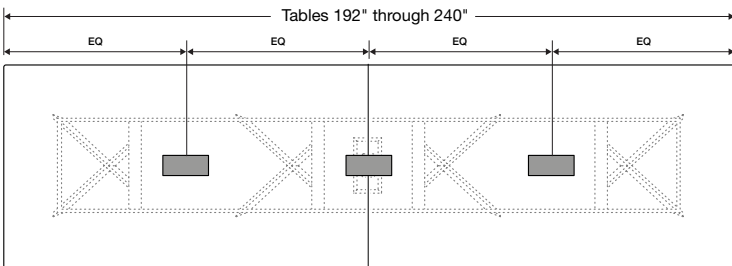

Tables 72" through 84" MhoB or Perimeter Power recommended

Tables 90" through 96"

Standard Plinth base allows for single trough only
Center bases start at 132"

Single or Double Power Comm Trough between bases

Cylinder

GC Interact, MhoB, and 7" single or double troughs can be oriented either direction.

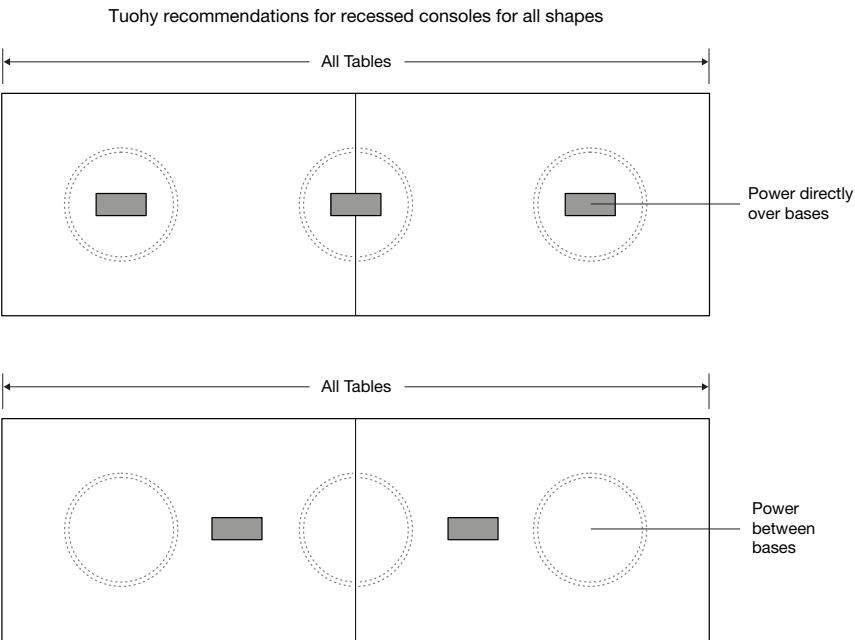

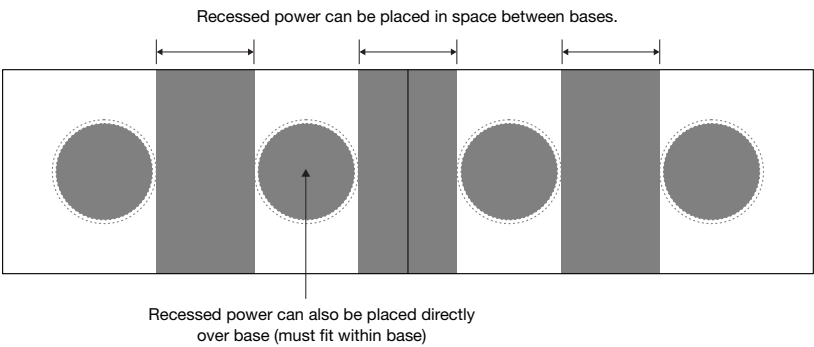

All single troughs 12" or greater, all double troughs and GC Interface units must be orientated this direction

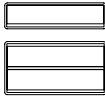

Troughs cannot extend with width of the cylinder base tables due to base interference.

All Tables allow wire management through cylinder bases if table has power.

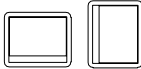

Plinth

All single & double troughs 18" or greater, and the GC Interface units must be oriented this direction.

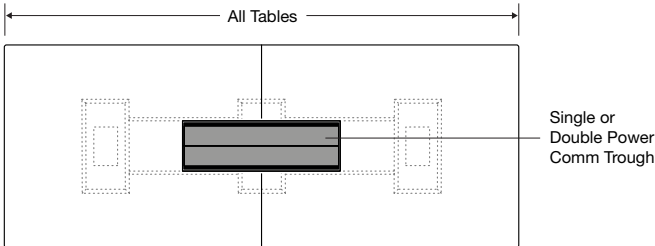

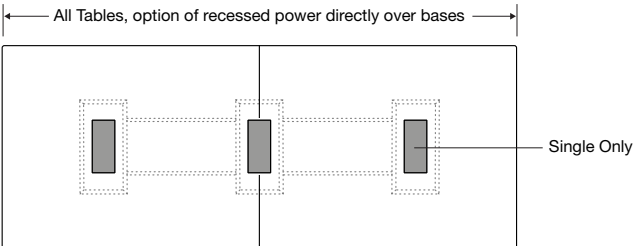

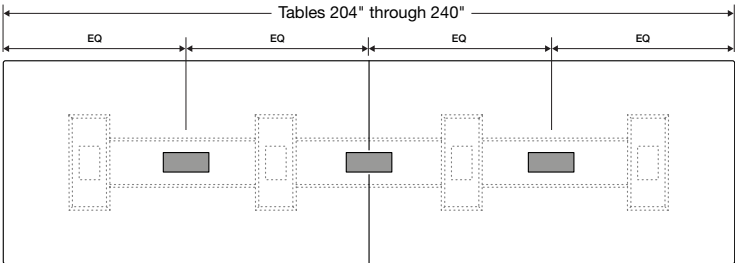

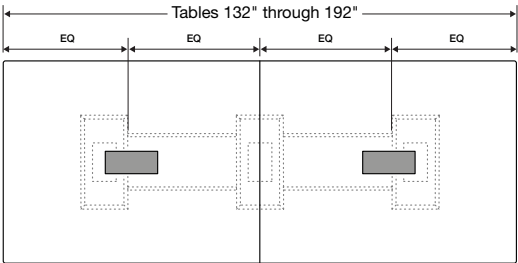

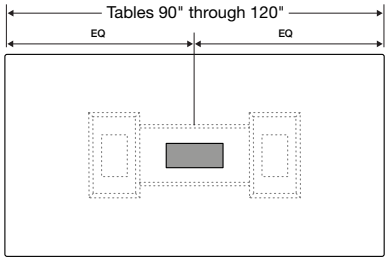

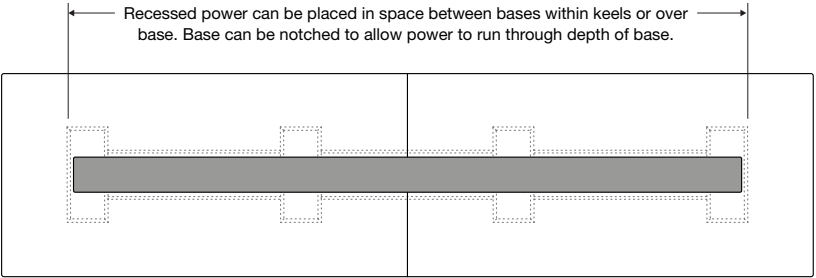

7" & 12" troughs single or double, MhoB and GC Interact units can be oriented either direction

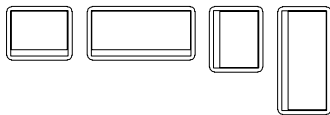

All tables allow for wire management through Plinth bases.

Tuohy recommendations
for recessed consoles
for all shapes

Ryvit & Spyda

7", 12"w & 18"w single & double troughs, GC Interface & Interact & MhoB can be oriented either direction.

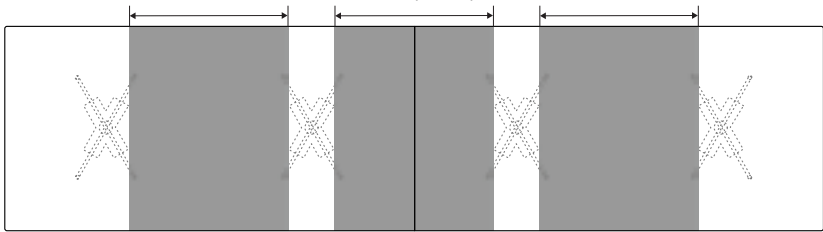

All single & double troughs 24" or greater must be oriented this direction.

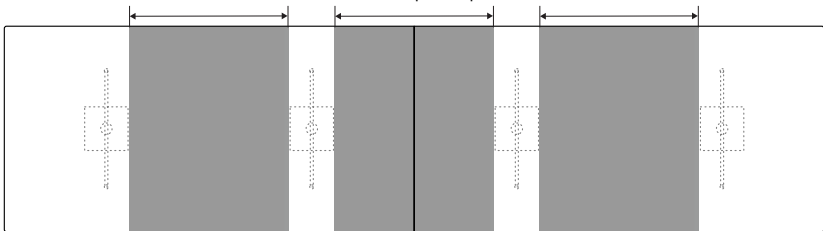

All tables require additional wire management options such as Cable Drop.

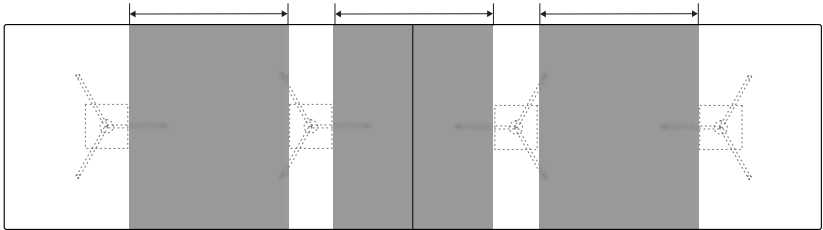

Recessed power can be placed in space between base plates.
Cannot overlap base plates.

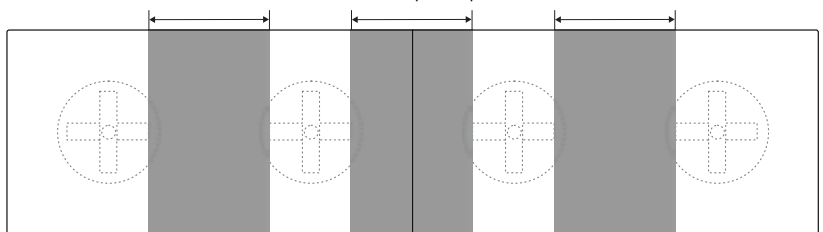

Recessed power can be placed in space between base plates.
Cannot overlap base plates.

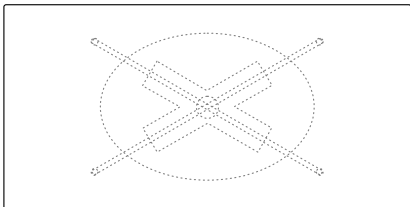

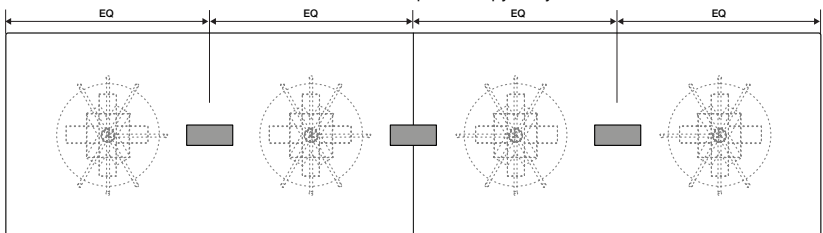

Recessed power can be placed in space between base plates.
Cannot overlap base plates.

Recessed power can be placed in space between base plates.
Cannot overlap base plates.

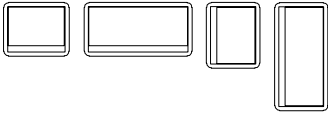

Tuohy recommends placing recessed power equally spaced between bases for all shapes and Spyda/Ryvit bases.

Small tables with a center base do not allow center power. Tuohy recommends perimeter power options.

Uffizi-Loop

All 7" & 12"w single & double troughs, GC Interface & Interact & MhoB units can be oriented either direction.

All single & double troughs 18" or greater must be oriented this direction.

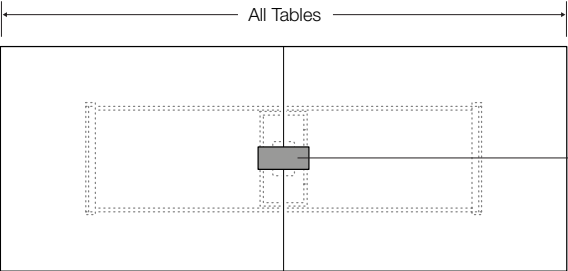

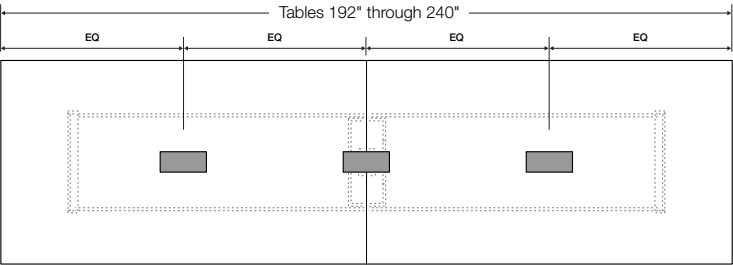

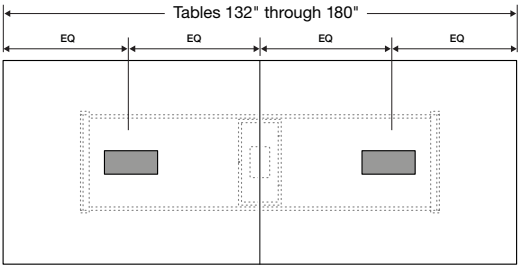

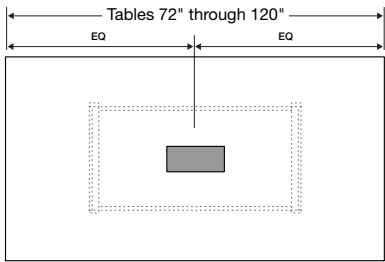

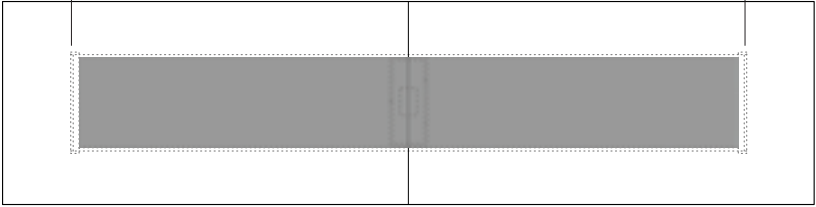

Tables 72" – 120" have no center plinth and require additional wire management options such as Cable Drop.

Tables 132" – 240" have a center plinth base that allows for wire management.

Tuohy recommendations for recessed consoles for all shapes

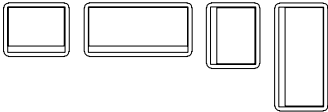

Recessed power can be placed in space between outer bases within base frame. Cannot overlap outer bases or frame. Recessed power can be placed over center base. Base is notched to allow power to run over depth of base (see base detail).

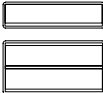

Single or Double Power Comm Trough

Zi-A & Zi-D

All 7" & 12"w single & double troughs, GC Interact, MhoB can be oriented either direction.

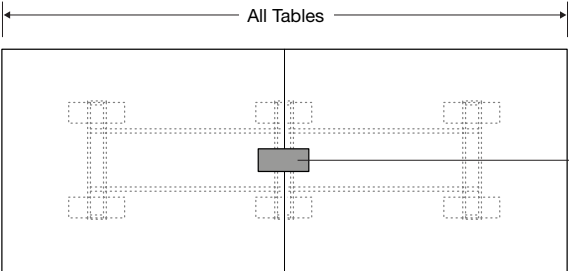

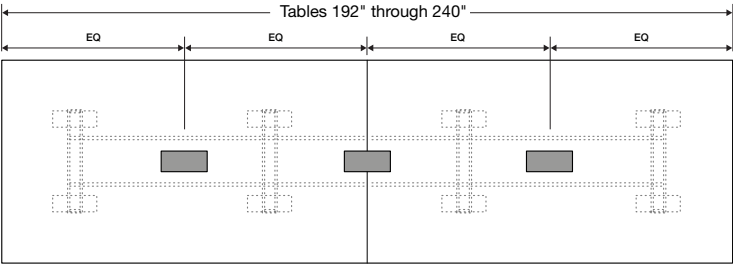

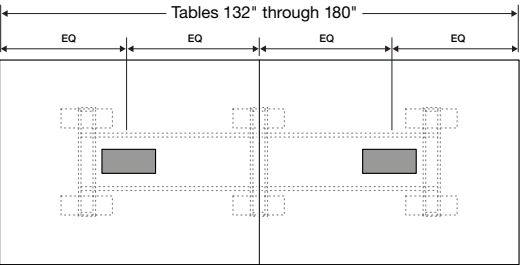

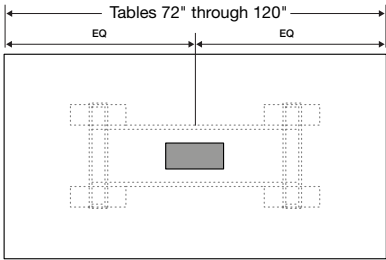

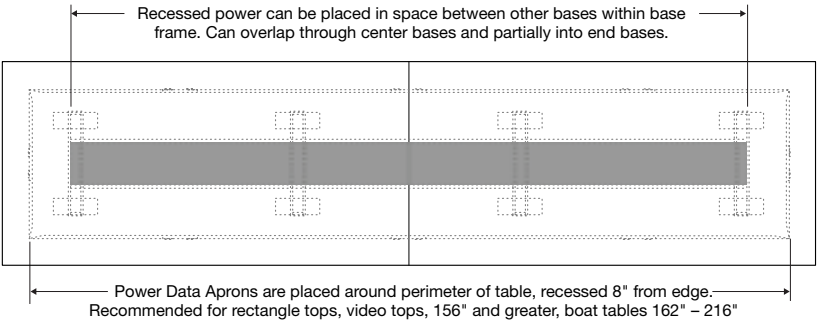

All single & double troughs 18"w or greater, GC Interface units must be oriented this direction.

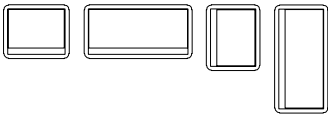

All tables allow for wire management through bases.

Tuohy recommendations for recessed consoles for all shapes

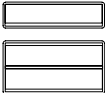

Wedge

All 7" & 12"w single & double troughs, GC Interact, MhoB can be oriented either direction.

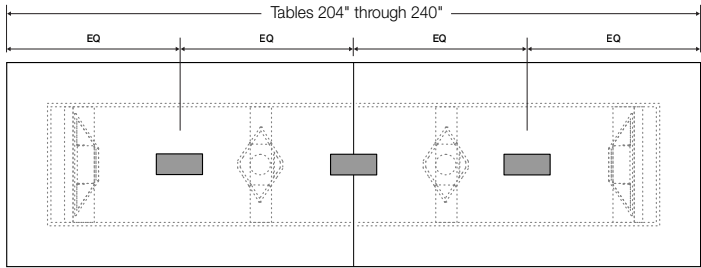

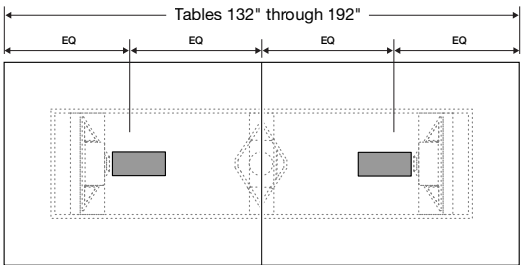

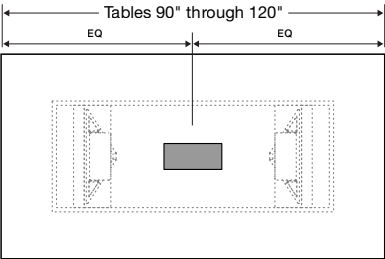

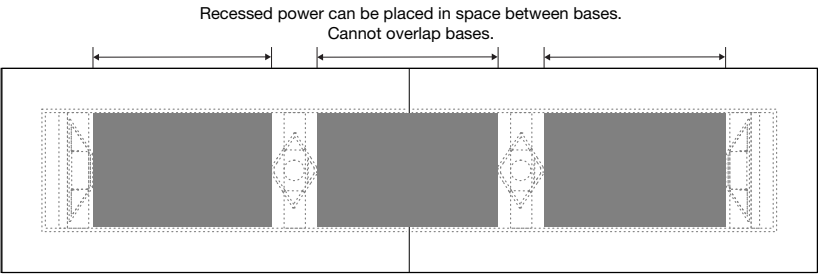

All single & double troughs 18"w or greater, GC Interface units must be oriented this direction.

All tables allow for wire management through bases.

Tuohy recommendations
for recessed consoles
for all shapes

Power Routing Overview

In – Through – Out

Getting power from the floor, into the table, through the table, and out for users to access in a clean way is easy with the many base options that Univers offers.

Out

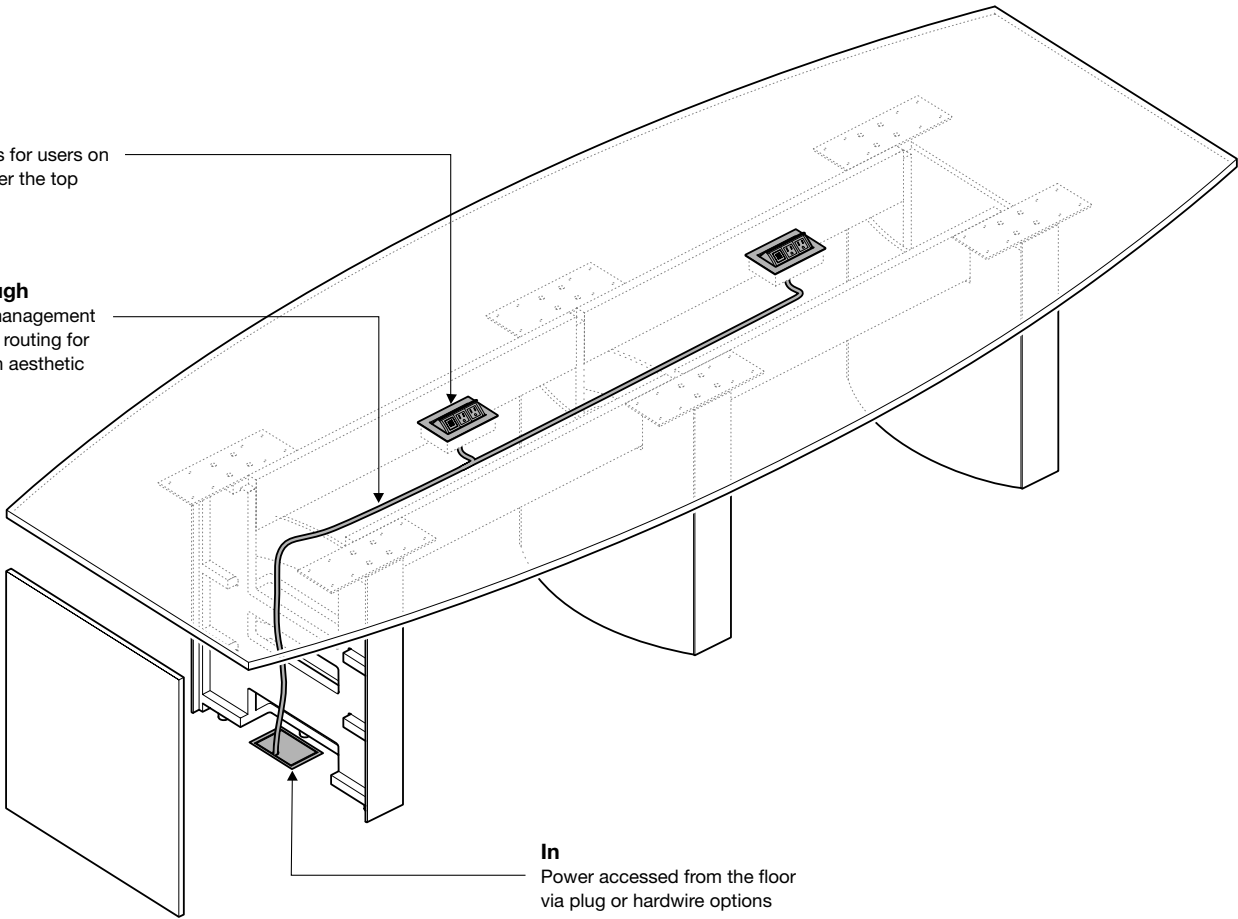

Access for users on or under the top

Through

Wire management & cord routing for a clean aesthetic

In

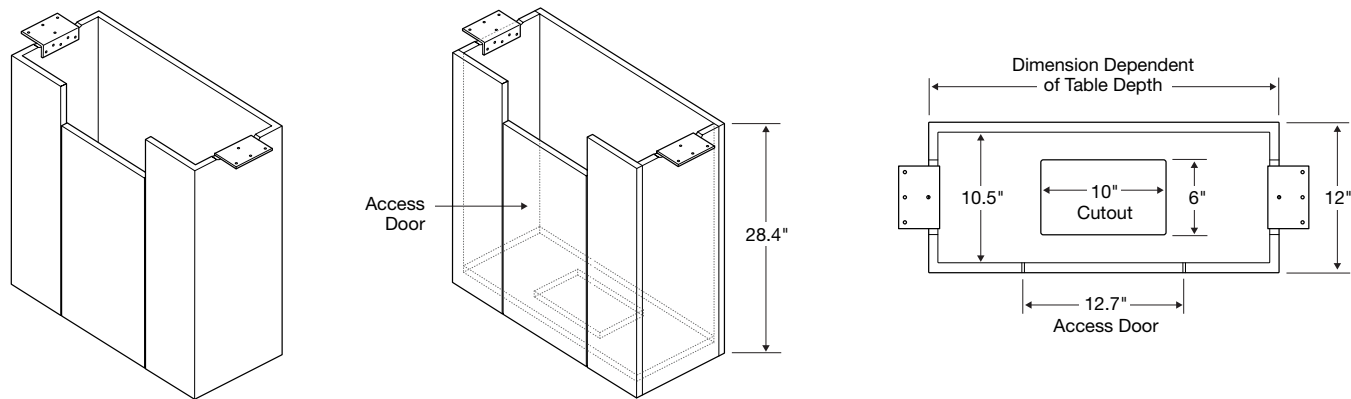

Power accessed from the floor via plug or hardwire options

Power Routing: In

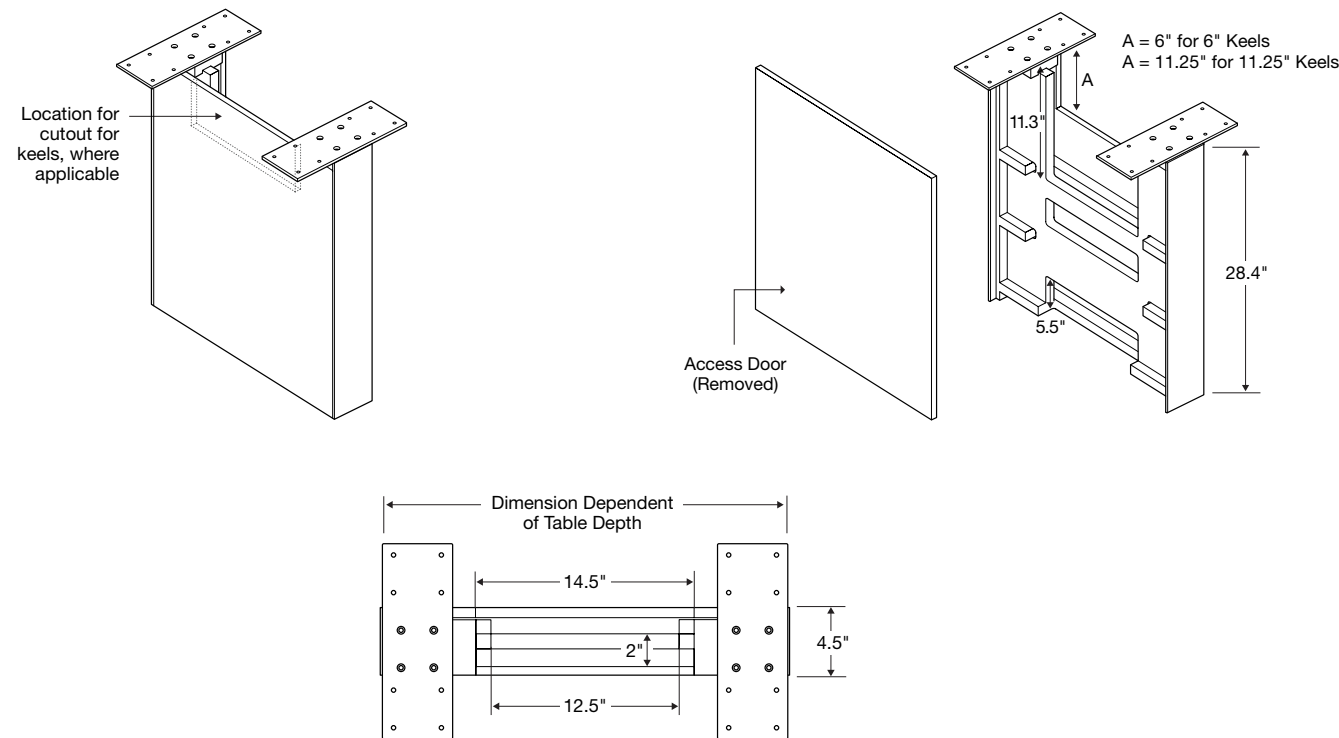

Several Univers base options have power routing capabilities created by removable access doors and a wire routing cavity.

Plinth Base

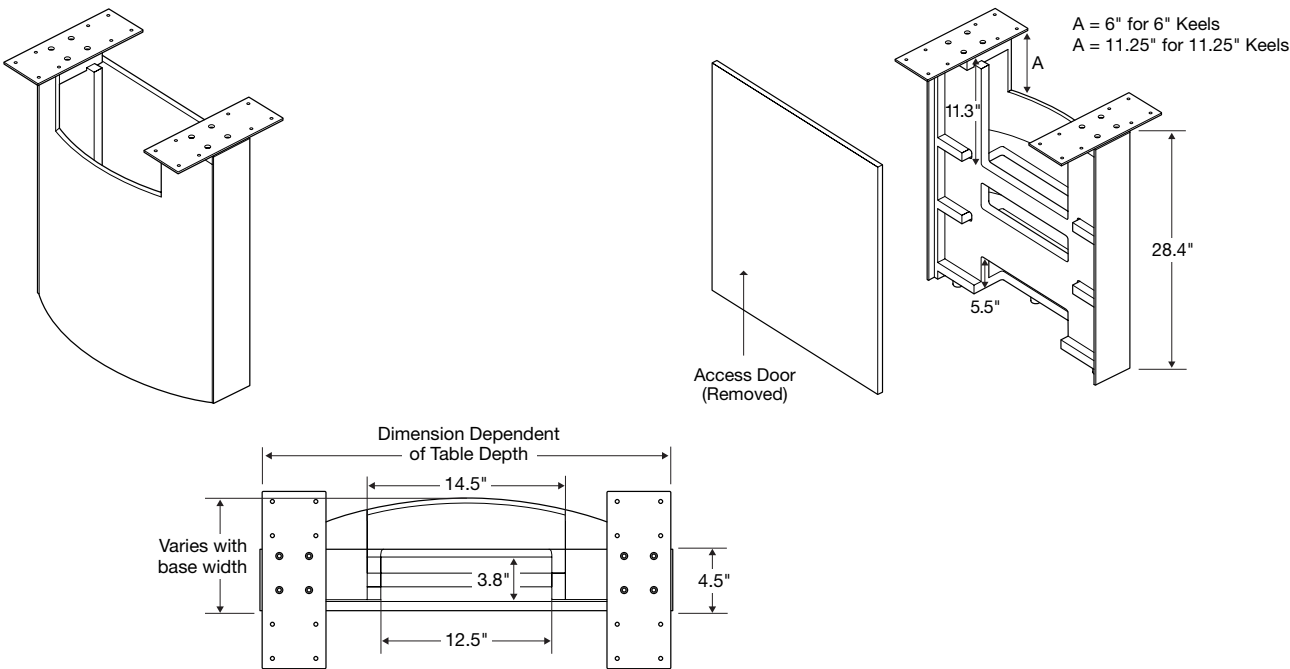

Zi-A Base

Details for bases 24" and over

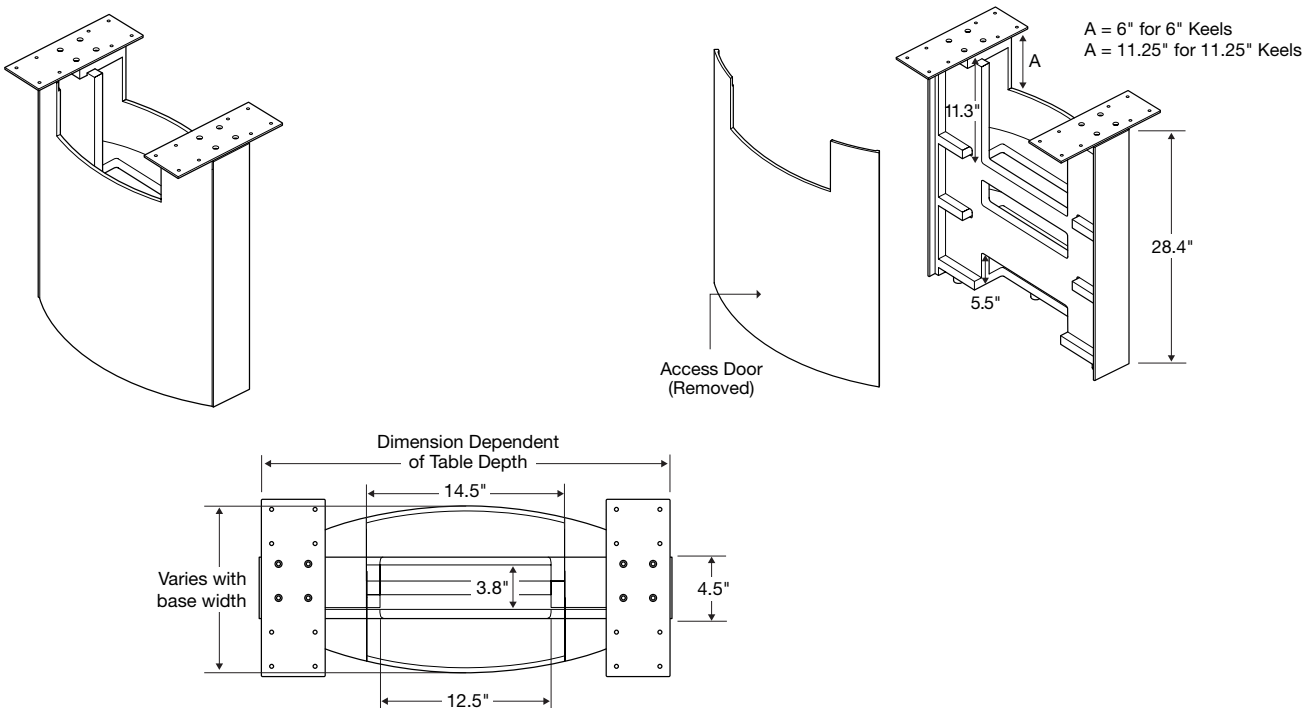

Power Routing: In

Zi-D Base – End Base

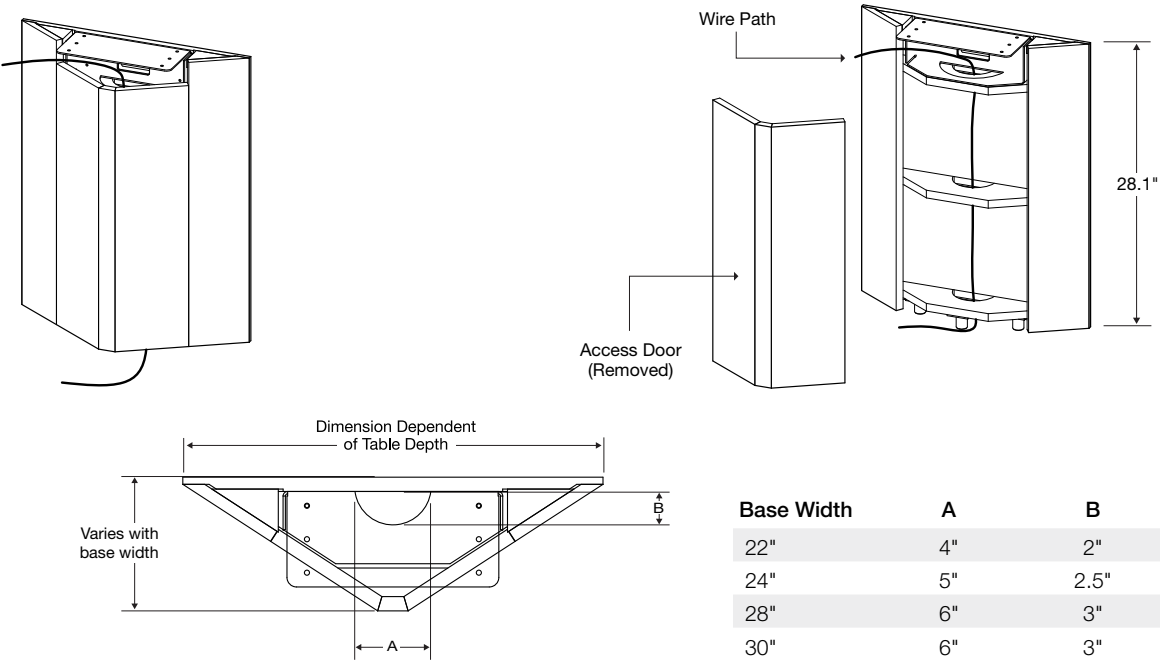

Zi-D Base – Center Base

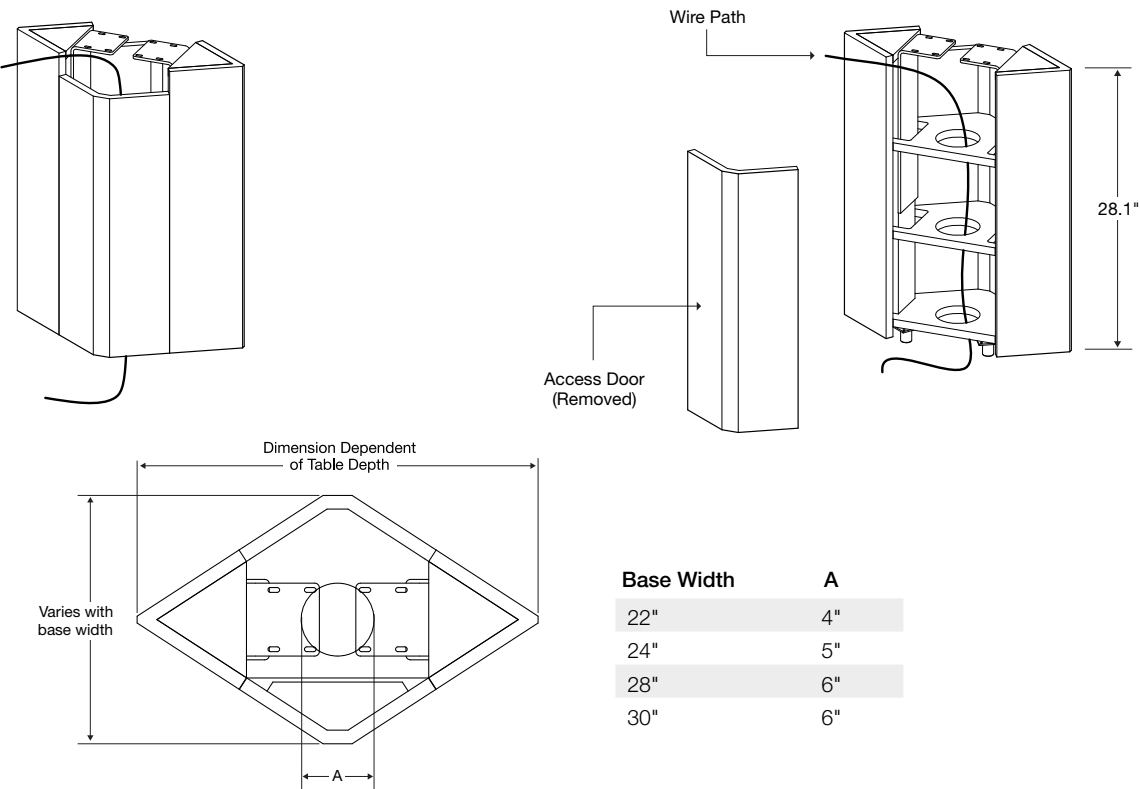

Power Routing: In

Wedge Base – End Base

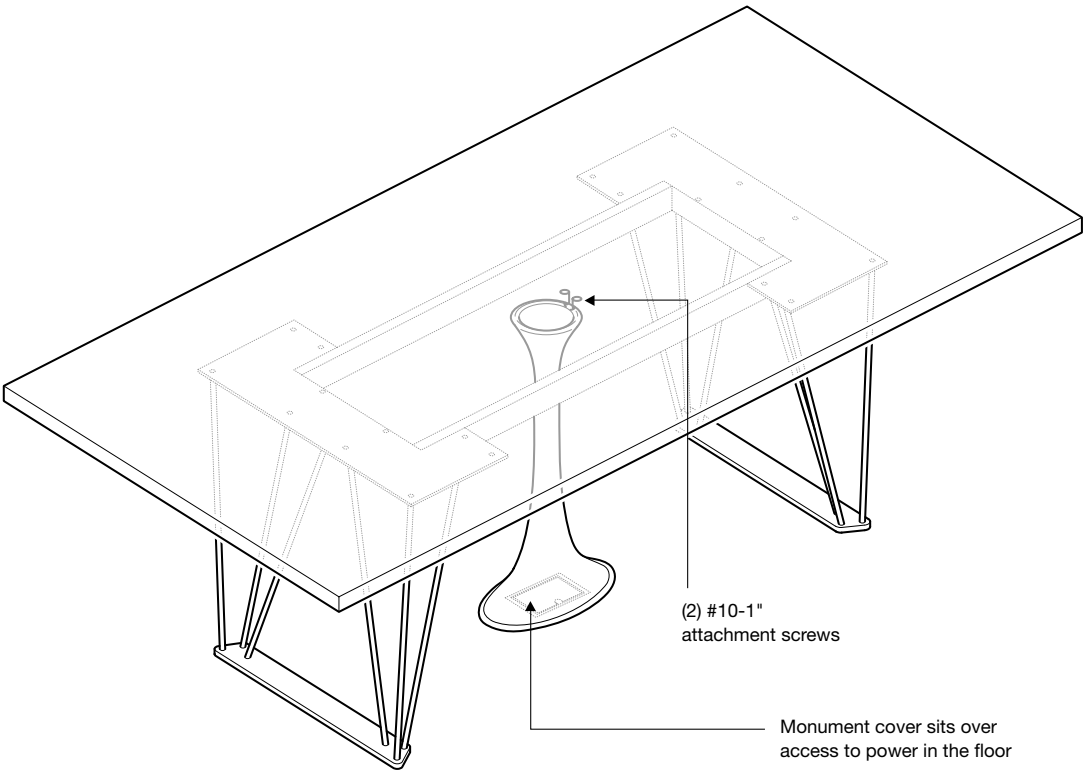

Wedge Base – Center Base

Power Routing: In

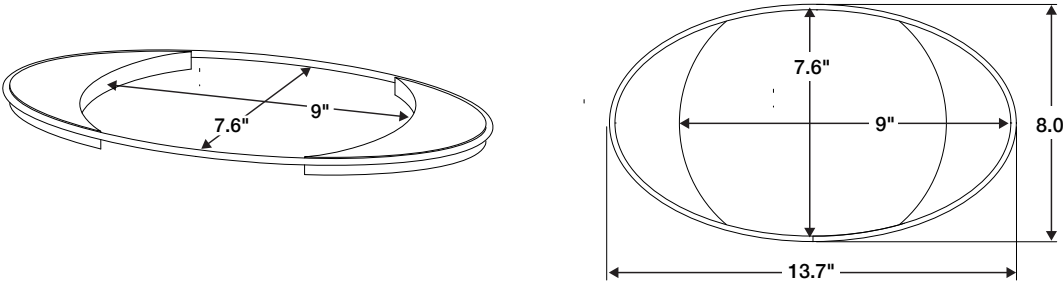

For bases that are more decorative, such as the Coda-V base, the Cavo Cable Drop can be added to help provide wire management from the floor to the table in a clean manner. Cords pass through the hollow sock that is offered in three color options.

After the sock is wrapped around the top ring, the ring is attached to the underside of the surface with screws. A gap between the top of the sock and the underside of the surface will remain to allow for cords to pass through.

Monument Cover Details

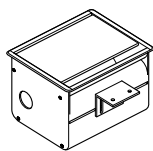

The monument cover fits over the power monument in the floor to allow for cords to route from the floor to the underside of the table in a clean manner.

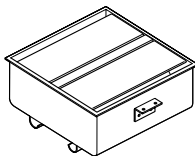

Power Routing: Out

Surface power and data options are mounted to or accessed through the top of the table surface, allowing for easy user access.
