

# DRAPED

COLLECTION

TUOHY

#### **Draped Collection**

Designed for contemporary elegance, the versatility of the Draped chair allows it to feel at home in any commercial, hospitality, or residential setting. The fully upholstered shell hovers lightly above a welded steel lattice creating visual depth through the interplay of shadow and linework.

This layered construction affords designers the ability to specify frame and shell finishes that create subtle variation or high-impact statements. Draped can also be specified as an open lattice, with upholstered seat and back cushions for a decidedly delicate appearance.

### Design and Function

Draped delivers maximum aesthetic versatility without sacrificing effectiveness as a guest, lounge, or dining chair. Combine fully and partially upholstered versions in endless finish combinations to simultaneously imbue contrast and consistency into large projects or create a deeply comfortable retreat for one with an expertly paired upholstery and metal combination. Draped streamlines furniture specification by performing multiple functions within a single piece, quieting the busy world with a familiar embrace.

**Design by Populace**

The Draped chair is at home in lobbies and reception areas, hospitality settings and executive offices to provide warmth with a decidedly modern flair.

**Draped Collection**
