

MELVIN

STOOLS

TUOHY

The Melvin Stool

The Melvin Stool is designed for comfort and function, especially where a small footprint is needed, such as event suites, hospitality areas and education settings. Each detail was thought through to ensure function and quality to accommodate these tight spaces.

Design

The stool does not have arms, but a gently sloped yet supportive back. This, along with the swivel, allows for easy entry and exit for users. A backless version is also available, and the stool can be specified in both bar and counter height.

Features

The swivel mechanism is hidden within the frame to keep the stool clean and light in appearance. Wood accents add warmth to the aesthetic and the base can be painted in a variety of colors and metallic finishes. The seat and back are fully upholstered for comfort and warmth.

Designed by Populous Design

Melvin is named after the designer's grandfather, from a small town in Kansas, who loves to brag to his friends at the coffee shop about what his grandson is doing in the "big city."

Melvin Stools
