

A modern dining table with a light wood top and dark base, surrounded by patterned chairs and pendant lights. The table is set with a dark placemat, a glass carafe, and two glasses. The scene is lit by five pendant lights, two black and three white, hanging from the ceiling.

STILLNESS  
TABLES

TUOHY

### Stillness Tables

Stillness tables are designed for high-impresion spaces including boardrooms and customer-facing meeting rooms. Beautiful wood veneers in any species, flitch-matching technique and finish give these spaces the prominence and prestige they deserve. Tops may be specified in a variety of materials including wood veneer, stone, solid surface and custom choices.

#### Details

With 30" between each seat and more leg room made possible by the low-profile plinth supported by elegant outriggers, Stillness respects the need for every individual's comfort and personal space. These low-profile outrigger feet provide stability for all sizes, including large board room tables 15 feet and above.

#### Features

Connectivity is conveniently accessible when you need it and disappears when you don't. Power and data are discreetly embedded beneath an integrated touch panel at every station, thoughtfully designed and precisely engineered for an elevated user experience. The panel opens and closes with just a touch and disappears when not needed.

## Finishes

The center section and plinth base offer areas of contrast with such choices as leather, metal finishes and custom materials. The plinth below the top can be opened to access cabling by simply removing the covers.

## Attention to Detail

Tuohy's attention to detail and wood craftsmanship are evident in the design and construction of the Stillness tables. Through a mix of state-of-the-art manufacturing and finishing processes, and time-honored handwork, every detailed is scrutinized for premium quality.
