Geneva

Casegoods

TUOHY

Geneva is a comprehensive collection of executive casegoods that elevate private offices, boardrooms, and more with refined wood, stone, and stitched leather details. The line includes an array of storage solutions—from credenzas and overhead units to wall-mounted storage and wardrobes. Tables and table desks also complement the storage designs. Combine them with modular pieces to create tailored L- and U-shaped configurations.

Elevated Architectural Presence

Geneva makes a strong visual statement through refined details and thoughtful construction. Cases can rest on distinctive brushed-nickel 9" leg frames or be full-height with recessed floor trim for a clean, built-in look. Table desks—available in rectangular, boat, and ellipse shapes—are finished with a beveled edge and an optional kerf detail. Specify drawer faces and panels in stitched leather or faux leather for added material richness.

Flexible Planning for Options

The collection supports a wide range of configurations, including desks, runoffs, and bridges, with height-adjustability available across many work surfaces. Credenzas can extend up to 10 feet and beyond, offering flexible storage options such as drawers, doors, and open shelving. Gallery panels are also available, which help create cohesive reception and administrative stations.

Integrated Storage and Workwalls

Design cohesive workwalls using credenzas, hutches, bookcases, and overhead storage. Geneva includes overhead units, wall-mounted storage, bookcase towers, cabinets, and wardrobe units—allowing you to layer storage vertically while maintaining a refined, architectural aesthetic throughout the space.
