

# Draped

Seating

TUOHY

Designed for contemporary elegance and versatility, Draped is equally at home in commercial, hospitality, and residential settings. Intriguing elements, including a steel lattice frame that cradles the upholstered shell, make this comfortable lounge chair an exercise in refined contrast and sculptural form.

### Make a Visual Statement

Draped features a distinctive layered construction that allows designers to specify frame and shell finishes that create striking visual depth through shadow play. For a more delicate look, specify the chair with an open lattice paired with an upholstered seat and a small, curved back cushion.

### Explore Your Finish Options

Combine fully and partially upholstered versions of Draped in limitless finish combinations to introduce contrast or continuity across large-scale environments. Choose from leather, faux leather, or a broad palette of upholstery options for the seat and back. Then complete the look with frame finishes in black, white, bronze, or dark bronze.
