

Danza

Casegoods

TUOHY

Our most comprehensive collection of casegoods, Danza features a simple aesthetic that complements a variety of settings. The collection includes desks, storage, panels, towers, power solutions, and more, providing options for outfitting a highly functional and appealing private office.

Diverse Storage Configurations

Specify an array of storage configurations with the Danza Collection, which includes towers, filing cabinets, and upper and lower modular storage. While all storage designs have a standard square-edge detail, you can specify curved edges on some pieces for a softer aesthetic. We've also crafted the collection with meticulous attention to detail, including dovetailed drawers for enhanced quality.

Wall panels may include slim metal shelves and overhead storage options include open shelving, hinged, sliding and bypass doors. We also provide back panels in various materials, including magnetic faux leather, which is perfect for making a functional style statement.

Ideal for a Variety of Settings

Whether you're designing a private office for a CEO, law partner, manager, or administrator, the Danza collection offers choices for creating a luxurious aesthetic or simple, functional space. Within these spaces, you can design any configuration of storage you need with Danza's wide array of components.

Add Height Adjustability Anywhere

Create opportunities for heads-down work and healthy movement throughout the office with our tables and desks. These include free-standing desks, returns, and wall-mounted and cantilevered designs. Many models are available with electric or battery-powered height adjustability, enabling sit-to-stand capabilities anywhere in the office.

Options to Enhance Your Design

Whether you'd like to create a bold look or a subtle aesthetic, the Danza collection provides a range of design opportunities. Drawer pulls come in numerous choices and finishes, while lighting options allow you to personalize the space.

Danza is offered in all of our standard veneers and finishes, or you can specify a custom veneer or finish. Desktops are available in a variety of materials, including veneer, solid surface, natural stone, glass, and more. We also practice parametric sizing to ensure that each product is precisely the right size.
