

# Montrose

Tables

TUOHY

Create a highly functional, beautifully appointed meeting space with the Montrose table. Individual power and data ports are easily accessible beneath the table's surface, making work and collaboration seamless. Available in a variety of shapes, sizes, and finishes, the versatile Montrose table will suit the needs of the space while conveying a premium aesthetic.

## Empowering Individuals and Groups

We designed the Montrose table to make connecting with power and data effortless so people can focus on working and interacting with one another. Everyone has a personal station with power, USB, and data outlets located beneath the table's edge. These stations are illuminated with dimmable lighting that features a soft 2700K color temperature.

The Montrose table also includes centralized power and data sources that are easily accessible through panels in the base.

### Offering Variety to Create Possibilities

The versatile Montrose table has a range of sizes, shapes, and finishes to help you bring your design vision to life. Available in parametric sizing for customization, you can specify tables up to 30 feet long. Choose from rectangle, oval, round, and racetrack shapes, along with square or curved corners for the top.

We also offer an array of top materials to enhance your aesthetic, including glass, quartz, marble, glass, solid surface, and custom materials. The table's veneer racetrack-shaped base features rounded corners and is available in various depths to accommodate the table's size.

To further enhance your design options, we've extended the Montrose collection to include credenzas and lecterns. These furnishings are also available in a variety of sizes and finishes, allowing you to create a cohesive look throughout a meeting space.
