

Nika

Tables

TUOHY

With a streamlined profile and effortless adaptability, Nika is ideal for conference and meeting rooms that require flexibility. Even the largest 60"-deep table is easy to move and reconfigure to suit people's needs or fold and nest to save space when tables aren't in use.

Made to Move

Designed for spaces where movement is a must, Nika tables have a variety of design details that ensure mobility. A ganging mechanism pivots from under each top to conveniently connect each table, while bumpers between tables protect tops from dents and scratches while nesting. The table's base conceals rolling casters, and you can lower a stabilizing glide to keep tables in place while in use.

Seamless Cord Management

Nika tables offer ample storage for cords and power supply units in the space below the worksurface, along with a leg panel that lifts to route and conceal cords. This keeps workspaces neat and floors free from tripping hazards.

Easy Power Access

Nika makes it simple for people to connect with power. Each table includes a duplex outlet that you can daisy chain to the next table. Surface power options, ordered separately, easily plug into the duplex outlet.
