

Norwood

Tables

TUOHY

Encourage collaboration and spark big ideas with the Norwood Table. Perfect for team huddles, this versatile table pairs seamlessly with large monitors to support presentations, remote brainstorming sessions, and virtual meetings.

Tailored for Collaborative Work

With the adaptable Norwood Table, you have an array of options for outfitting a meeting space that's customized to a team's collaborative needs. Choose from veneer, laminate, solid surface, glass, marble, quartz, or other custom materials, and specify a square, rectangular, half-racetrack or unique wedge profile that's optimized for groups viewing a large monitor. Further enhancing design flexibility, the Norwood Table is available in lengths from 54" to 84", with square or beveled edges, and square or rounded corners.

Engineered for Seamless Function

Create a clean, minimalist aesthetic with the Norwood Table's streamlined design. Discreet cable management routes all wiring for the monitor and power through the back panel and top, keeping the surface clutter free. The result is a tidy tabletop that offers ample space for people to work together.
