DRAWER CONSTRUCTION

A fine point for a quality casegood product is the inner drawer construction. Each TUOHY casegood offers you uncompromised excellence in this area as well. Drawer boxes are constructed with dovetail joinery for maximum durability. The drawer face is mounted separately to this box (i.e., five-sided construction) to maintain integrity.

Drawer bottoms are dadoed on all four sides. Slides for box drawers are rated at 100 pounds per drawer; slides for file drawers are rated at a heavy duty 150 pound load per drawer. All slides have progressive action.

Box drawers have a removable divider, adjustable when depicted (÷). File drawers have file frames for filing laterally or front-to-back, as depicted.
For Drawers for Lap Area, Drawer Pencil Tray, and Locks: See the Introduction/Terms-Options section of the Master Price List, page 12.

TUOHY

Prima Collection is a highly flexible system of furniture components that combine to create an extensive, elegant and creative series of reception and administrative assistant workstations.

Simply configure desk, runoff, bridge and credenza shells to form in-line, L-shaped and U-shaped layouts. Add pedestals and situate galleries and/or surround panels as needed.

You have considerable flexibility in the scale and placement of these elements. Surround panels and gallery fronts may be defined in whatever segmented matrix and material you desire.

In addition to what is presented here, Prima has been designed to accept a nearly limitless range of customers' architectural and interior materials and finishes. Use Prima for maximum impact in reception areas, but with considerably less rigor and expense than custom millwork solutions.

Width & Placement Relative to Shell

Function and form are achieved by your relative placement of surround panels and galleries on the casegood shells, whether centered, shifted left or shifted right by any dimension you desire.

Surround Panels are 2 inches thick, modular, and specified in left-to-right approach sequence at widths from 21 inches to 124 inches. Each surround panel is one segment wide by up to three segments tall (see 1x1, 1x2 and 1x3 at right). Surround panels may abut galleries.

Galleries are single mass, 10.8 inches deep, specified according to the desired matrix layout as shown at right. Galleries receive a transaction top and backsplash or tackable surface, all of which are specified separately.

All panels and galleries have a mitered/quirk detail at corners to perpendicular runs.
