

Veda

Seating

TUOHY

Veda delivers essential comfort through a simple, intuitive design that supports you as you sit. The chair's patented hinge system allows the back to recline independently from the seat, creating an open angle that maximizes relaxation.

Comfortable, Adjustable Design

Veda promotes well-being for everyone in the workplace with a design that suits an array of body types. People can easily modify the chair's height to suit their needs with a synchronized or standard pneumatic height adjustment. The design is also available in mid-back and high-back versions that suit a range of workstyles and environments.

Simple Form, Refined Palette

Veda has a clean, modern profile with fixed arms and a choice of either a plastic or polished aluminum base. Available in a thoughtfully curated palette that complements many interiors, Veda is available in a black or gray frame, and in black, gray, or light gray mesh.
