Prima

Casegoods

TUOHY

Prima blends elegance with multifunctional design in a modular casegoods collection for modern reception areas. The collection features a customizable approach panel, available in a variety of materials for a defining look. Crafted with parametric sizing, Prima is both practical and adaptable, delivering millwork-style customization without added cost or extended lead time.

Parametric Precision, Millwork-Level Results

Parametric sizing enables an exceptional degree of millwork-style customization without the typical penalties of added cost or extended lead times. This allows the freedom to fine-tune proportions, panel divisions, and material applications while maintaining efficiency and consistency across the project.

Create a Custom Look

Prima offers an array of storage elements in standard and custom materials. The approach side of the reception station features a signature panel that can be divided into numerous segments. Specify this panel in a wide range of materials—including wood, 3form, glass, marble, faux leather, wire mesh, and more. Define surround panels and gallery fronts in nearly any segmented matrix and material combination for a unique layered aesthetic.

Flexible Planning, Integrated Power

Configure reception stations using desk, runoff, bridge, and credenza shells to form in-line, L-shaped, or U-shaped layouts. Add pedestals, situate galleries, or incorporate surround panels as needed. A full range of storage options—including shelving cabinets, box and file drawers, utility drawers, and trash/recycle drawers—supports daily functionality, with power and data accessories integrated seamlessly where needed.
