Tryg

Tables

TUOHY

Tryg is an artful, architectural table designed to elevate conference rooms and collaborative spaces. Its signature slanted base creates a striking geometric silhouette while cleverly concealing power and cable routing—delivering both elegance and everyday functionality in one sculptural form.

Designed for Presence and Flexibility

Make a bold statement with a table you can easily tailor to the functional needs of a space. The design features expansive tops, which can stretch up to 20 feet and beyond—ideal for boardrooms or large meeting environments. The table is also available in both seated and standing heights, providing options for private offices or more active, collaborative zones.

Options that Amplify the Aesthetic

With surfaces available in veneer, HPL, glass, solid surface, quartz, marble, faux leather, and custom materials, Tryg adapts beautifully to a wide spectrum of interiors. Further tailor the table with bevel- or square-edge details, each available with or without a refined metal edge.
