Keaton

Tables

TUOHY

Keaton blends mobility and versatility in a refined, height-adjustable table. Equally at home in workstations, private offices, and administrative environments, Keaton delivers seamless adaptability with a quiet, contemporary presence.

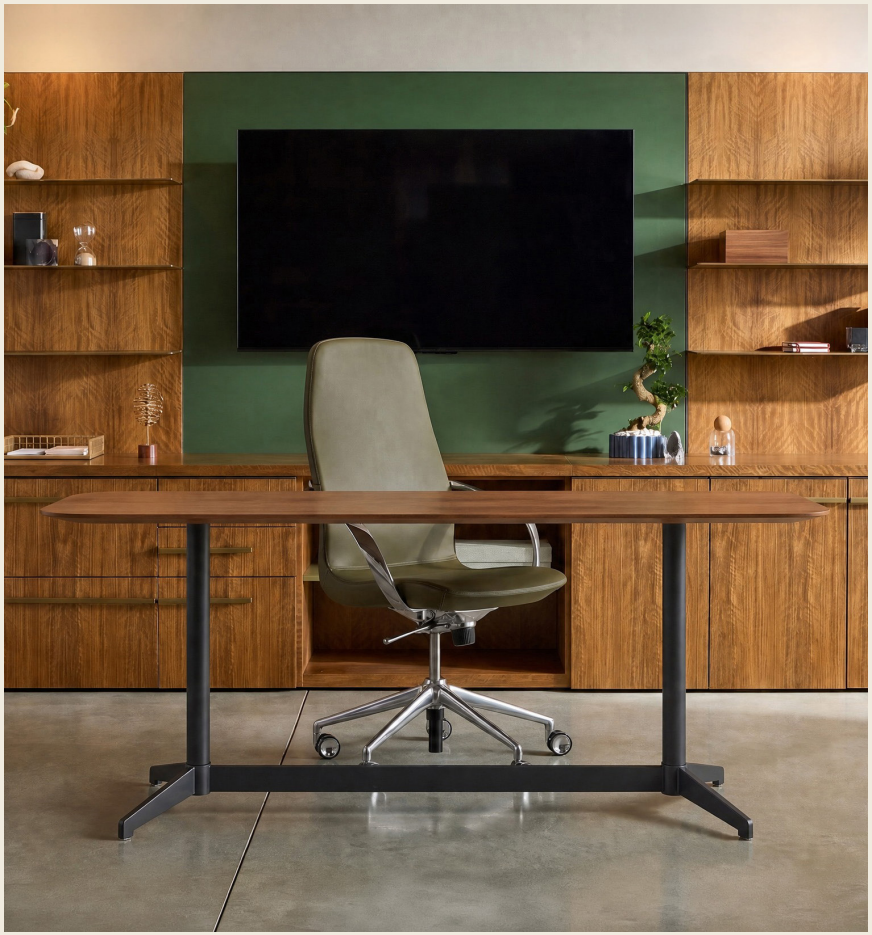

Purposeful Ergonomics, Effortless Flexibility

Keaton offers an intuitive sit-to-stand experience. The table's height range goes up to 48 inches, supporting people of diverse statures. Its stable T-leg base—with locking casters or glides—moves effortlessly wherever it's needed, while an optional battery-powered mechanism frees the table from cords and outlets, providing flexibility throughout a space.

Opportunities for Customization

To tailor the table's look and feel, choose from rectangular or elliptical tops, two base styles, and an optional modesty panel for added functionality. Surfaces are available in veneer, solid surface, glass, marble, quartz, or custom materials—each paired with square, bevel, or cantilever edge profiles to elevate the aesthetic. We also offer a fixed-height version with the same clean geometry and careful attention to detail that define the Keaton aesthetic.
