Leit

Seating

TUOHY

Named for the leitmotif—a recurring musical phrase associated with a specific theme—Leit brings a consistent design language to a wide range of spaces. The modular system integrates a variety of seating options to create adaptable environments, from focused private offices to expansive public settings.

Minimalist by Design

A refined mix of materials gives Leit aesthetic appeal with a clean silhouette. Each seating element is available with arms or armless, offering greater freedom to tailor the system's look, function, and level of support.

Configurations for Any Setting

Single- to quad-width chairs and single, double, and triple benches support configurations of nearly any scale. Corner units create modular arrangements, while compact pieces provide convenient extra seating in private offices.
